

A circular inset image showing a person in a blue shirt and shorts standing on a large, dark rock that is part of a natural rock bridge or overhang. The person has their arms raised in a 'V' shape. Below the rock is a deep chasm with a blue sky and clouds visible. The surrounding rock is light-colored and textured.

Something more than **SPC**

The headquarters of the CLASSEN Group in Kaisersesch is the centre for the design and production of SPC composite wall and floor coverings. Our unique technology enables us to produce a PVC-free, 100% recyclable product with the best designs as well as excellent quality and finish.

From raw material production to plate extrusion, from digital printing technology to durable surface layers, as well as milling our easy-to-install joining system and preparing products for shipment - all processes are closely integrated in our modern factory.

All this out of concern for health and well-being of all of us and in order to slow down climate change.

Natural look

Thanks to our unique digital printing technology, we are able to create decors that perfectly reflect natural wood.

Protection against water

A rigid core composite flooring, also known as SPC flooring, is the most durable waterproof vinyl flooring on the market. The 100% waterproof core is a reliable and proven protection against the effects of water spills.

High abrasion class

The entire collection is non-slip, includes an AC5 or AC6 surface layer for heavy traffic and has the best result in terms of dimensional stability. In addition, Ceramin boards are really light, yet still very durable.

Different dimensions

We offer beautiful wood and stone patterns and many sizes of our planks and tiles. Colours and textures are the best inspiration for new and interesting designs.

A durable and sustainable concept with an **ecological polymer**

We constantly strive to achieve a closed product life cycle, including its production, use and then its disposal in the recycling process. We are able to recycle Ceramin and give it a second life in our own products or in garden furniture, car bumpers or packaging. Thanks to the use of green electricity at our site in Kaisersesch and participation in CO₂ projects, we have already become completely neutral in terms of carbon dioxide emission.

High stability & strenght

Acoustic comfort

100% waterproof

Warm when touched

Eco-friendly & PVC-free

Light & easy to handle

Thin, ideal for renovation

Easy cutting

Quick locking
